

PROFILE

I was born on February 19th, 2003, in Gorakhpur, Uttar Pradesh, and I have been freelancing as a web developer for more than five years. My passion for web development started at an early age, and it has grown into a fulfilling hobby for me. In the future, I hope to continue my studies in physics and biology and contribute to the scientific community through my research.

SKILLS

About Me

I was born on February 19th, 2003, in Gorakhpur, Uttar Pradesh, and I have been freelancing as a web developer for over five years. My passion for web development started at an early age and has grown into a fulfilling hobby for me.

I am currently pursuing my undergraduate BSMS course at IISER Mohali, a prestigious research institute in India. I am keenly interested in physics and biology research and enjoy learning about the latest advancements in these fields.

As a web developer, I have gained much experience creating responsive and user-friendly websites. My skills include HTML, CSS, JavaScript, and other popular programming languages.

I have also worked for SciAstra as a part-time web developer, gaining valuable experience working on real-world projects. I enjoy collaborating with other developers and designers to create visually appealing and functional websites.
